## **Superior Street to undergo make over**

The City of Duluth is planning to mill and pave Superior Street between 10<sup>th</sup> Ave East and 21<sup>st</sup> Ave East next week starting on September 16, 2010.

Milling operations between 10<sup>th</sup> Ave and 14<sup>th</sup> Ave East will be done under traffic. Access to businesses and residents will be available during the entire project.

Closure of west bound Superior Street between 14<sup>th</sup> Ave East and 21<sup>st</sup> Ave East is anticipated for about one week to complete the milling and paving. The east bound lane will remain open to traffic. This work will then be followed with milling and paving on the east bound lane leaving the west bound lane open. DTA buses, ISD 709 buses, and local residents will have street access during the repairs. Other through traffic will be detoured. North and south bound traffic will have access on the avenues.

Motorists are reminded that 19<sup>th</sup> Ave East (between Superior Street and 8<sup>th</sup> Street) is currently closed for rehabilitation of the concrete pavement, pedestrian ramp improvements, and catch basin rehabilitation.

The City appreciates the public's patience and cooperation. Motorists are advised to drive carefully and follow posted detours.

The public can find information on current street projects by visiting [www.duluthprogress.com](http://www.duluthprogress.com)

Media with questions can contact the Project Engineer, Pat Mlakar, at (218) 730-5087.
