Engineering

Room 240
411 West First Street
Duluth, Minnesota 55802

 218-730-5200

All areas of exposed sand after completion of work must be stabilized by topsoil and sod or other means. Indicate how exposed areas will be stabilized after completion of excavation:

A scale drawing illustrating subject property and areas of removal and disposal, if on the same site, must be provided.

APPROVAL:

Cynthia J, Voigt, City Engineer

The approval of this form grants permission to **move** the requested sand only and in no way supersedes any other permits that may be required of the applicant or owner. Please check with the Engineering Division and Building Safety for any other possible permits or regulations.

After completion of this form, return to PUBLIC WORKS & UTILITIES/ENGINEERING DIVISION, 240 City Hall, 411 West First St., Duluth MN 55802; phone: 730-5200.

This permit is required per Duluth City Code, Article IX, Minnesota Point, Sections 45-100 & 45-101.

For work involving the beach, permittee should also contact the Minnesota Department of Natural Resources to see if a permit is required from them (for example, grading below the OHWL - Ordinary High Water Level - requires a MN DNR permit).
